FOUNDATION DOCUMENT

The undersigned Societies are agreed that a friendly collaboration in the field of biotechnology in Europe, and the interests of their members, can be well served by the establishment of a European Federation of Biotechnology.

The undersigned technical and scientific societies, through their appointed representatives, have therefore decided to found jointly a European Federation of Biotechnology. They are further agreed that the Federation is to be established on the basis of the statutes which have been accepted at the inaugural meeting of the Federation held on the same day.
